EXPERIENCE

SOFTWARE ENGINEER | GLOBALLOGIC

Noida | Dec 2020 - Present

- Collaborated with an agile team of 10 internal members and worked with a US based Edtech firm for about 2 years.
- Developed solutions for K-12 human capital, business operations, and student management as a Front-End Developer for the client.
- Designed and developed a tool called Exporter which helped the client export, merge data from multiple datasets and automate exports on defined intervals.
- Developed and implemented static mock-ups into fully functional UI using ReactJS with typescript, redux & bootstrap.

PROJECTS

Transfly

Bhopal | February 2019 - March 2019

- Ideated and built a Web application for the management of Mineral Ore Freight at mining sites.
- Application was used by the Government of Odisha for the management of Freight at Mineral Ore sites in Odisha.
- Built the application capable of managing the entire booking to delivery process and maintaining records of all the loading and unloading activities at a site.
- Used NodeJS and MongoDB to build the web application.

VISION | Voice assistant wearable for visually impaired

Bhubaneswar | August 2018 - October 2018

- Designed an eye wearable for visually impaired with voice enabled text reader and object identifier
- Wearable capable of Image capturing and text recognition possible via GCP integration on raspberry pi and audio conversion using GTTS
- Hardware handling and sending API calls done using some python logic.
- Helping the impaired identify objects via audio and also helping them access and control electrical appliances through voice commands.

AWARDS & ACHIEVEMENT

- Won the First Prize in Smart Odisha Hackathon among 30 finalists.
- Pitched the idea of a VISION - voice assistant eye wearable for visually impaired
- Built a working prototype and won 75,000 rupees as award money
- Felicitated by Chief Minister of Odisha, Naveen Patnaik, our project also appeared in News Channels
